Water with Perfection

A beautiful day begins with NEER ON...

The choice is yours

The shape of the fittings, the contours of the spout, the height and diameter of the body, the shape of the handle - these and many other important details come into play when you are choosing the perfect fitting. To make the decision easier for you, we have prepared a summary of all of the available series of NEER ON bathroom fittings.

The side view of the fittings can help you compare and contrast the main characteristics and features. Each model has a unique shape that satisfies different needs and complements different bathrooms interiors. Choose the fitting that is perfect for you!

ARCHIES

The ancients associated architecture with mathematical precision and ideal proportions. They sought harmony in their surroundings and tried to recreate it in their interiors. If you share their belief in the enduring principles of beauty, allow yourself to be inspired by the geometric shapes, straight lines and subtle forms of classical designs.

The gentle curves and rounded surfaces of the NEER ON line make these fittings the perfect solution for lovers of tradition who nonetheless appreciate modern designs. With a fitting from the line, you can create an interior that follows the principles of timeless design organised, harmonious, and combining conventional forms.

The sturdy shape of the spout is complemented by the light form of the lever.

The dynamic angle of the fitting gives the design its fresh and light character.

The subtly integrated aerator is reliably resistant to limescale and saves water.

ROYAL

The classic, timeless design of ROYAL has an expressive character. With their ergonomic considerations, the fittings prove themselves as solid workpieces of the highest manufacturing quality.

The classic, timeless design balances elegance with most furnishing styles – whether modern or conventional.

The high-quality materials of the fittings and their solid workmanship give users a great feeling and confirm they have made the right decision.

Quarter Turn - 15mm

Royal represents powerful and elegant design, which fulfils the highest quality requirements and still remains affordable.

The surface of a fitting has to endure a lot. Chrome plating provides an elegant shine, protects the fitting and makes it resistant to corrosion and other influences.

The highly efficient washbasin fitting conserves water and energy by reducing warm-water consumption.

KAYA

KAYA combines top-class design with outstanding functional characteristics. The elegant fittings blends in well with modern interior design styles and is excellent proof that style doesn't depend on budget.

The perfect fitting is planned down to the smallest details: The aerator is limescale-resistant, economical in consumption and discretely integrated. It is also easy to clean.

A fashionable beauty that gives new joy every day.

Soft curves and a harmonious look make it a pleasure to behold and use.

The design and ergonomics of KAYA go hand in hand. The perfectly designed lever ensures easy and comfortable operation.

SPIRAL

In an elegant and functional interior, every detail matters. Giving careful consideration to ergonomics and design when choosing solutions for your bathroom will enable you to create a bathroom that looks and feels perfect in every way.

The masterfully crafted line and cylindrical shape of the spout is ideally suited to modern luxurious interiors in which the emphasis is on the fine details

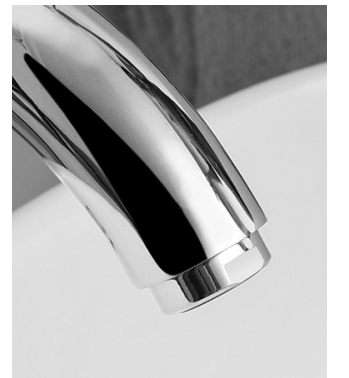

Draw inspiration from the cutting-edge contours of the body and the handle of the fitting.

With its universal geometric form, the fitting matches the style of any bathroom.

The clean lines of the body and handle make this fitting an ideal component of a visually harmonious interior design.

CB-5011
M.R.P ₹ 4015/-

Features

Water Aeration

All mixer use spout aerators or flow straighteners to add bubbles to the water leaving your tap. These innovations in fluid technology keep your water flow in a controlled and distinctive pattern and eliminated splash back. Simple ideas, refreshing benefits.

Valve Cartridges

All Neeron cartridge designs are tested for over 2,00,000 cycles before we will pass them for use within our taps. Why? Well this means that under normal use conditions your tap valves have proven that they will work for many years to come. The kitchen tap is the most used appliance in the kitchen, so valve quality assurance is essential.

Finishing Quality

We use traditional artisan hand polishing techniques which ensure perfect blemish free surfaces and crisp edges. Our hand treatment does not end there - we use hand plating for Chrome, Nickle and Bronze plating. Yes we know it is more expensive to do it this way, but it means that the finish is richer, the plating deeper and ultimately more durable.

Water Saving Aerator Neoperl Brand from Germany

After taking all this care with the product, we want to ensure they reach you in perfect condition with all the parts that you will need for a seamless and straight forward installation. Fixing kits and tail pipes (with non return valves where necessary) are provided and desgied to seat neatly within a standard 35mm tap hole. If the tap is heavy or tall, we also provide you with a stabilisation bracket in the box. We try and think of everything so you don't have to.

Comprehensive Warranty

Such is our dedication and reputation for quality, we offer a Comprehensive 10 Year Warranty on all our mixer tap products, from our least to most expensive designs. We cover the materials used and valves for 10 years from the date of installation.
